

Data Structures

and

Algorithm Analysis in C

(second edition)

Solutions Manual

Mark Allen Weiss
Florida International University

Preface

Included in this manual are answers to most of the exercises in the textbook *Data Structures and Algorithm Analysis in C*, second edition, published by Addison-Wesley. These answers reflect the state of the book in the first printing.

Specifically omitted are likely programming assignments and any question whose solution is pointed to by a reference at the end of the chapter. Solutions vary in degree of completeness; generally, minor details are left to the reader. For clarity, programs are meant to be pseudo-C rather than completely perfect code.

Errors can be reported to weiss@fiu.edu. Thanks to Grigori Schwarz and Brian Harvey for pointing out errors in previous incarnations of this manual.

Table of Contents

1. Chapter 1: Introduction	1
2. Chapter 2: Algorithm Analysis	4
3. Chapter 3: Lists, Stacks, and Queues	7
4. Chapter 4: Trees	14
5. Chapter 5: Hashing	25
6. Chapter 6: Priority Queues (Heaps)	29
7. Chapter 7: Sorting	36
8. Chapter 8: The Disjoint Set ADT	42
9. Chapter 9: Graph Algorithms	45
10. Chapter 10: Algorithm Design Techniques	54
11. Chapter 11: Amortized Analysis	63
12. Chapter 12: Advanced Data Structures and Implementation	66
